- **Chairman Advisor** 2023 - 2025
BUK, Al Jamieat Albritaniat Kuwait Limited | Kuwait
Ongoing project to establish a British university in Kuwait, addressing a major gap in the country's higher education sector.

ESSENTIAL EXPERIENCE

I began my business journey through the family business around 2010, which provided the foundation for cultivating a powerful, VIP-level network with top-tier entities and leading multinational corporations across both the private and public sectors in the Arab Gulf region and Europe.

Key Experience and Strategic Projects Undertaken Under Our Family Business

- **Mercedes-Benz:** Appointed us as regional representatives for the exhibition and sale of Actros trucks in Iraq, driving brand presence and market penetration.
- **Siemens:** Partnered in the development of advanced radar systems in the Kingdom of Saudi Arabia, with a focus on safeguarding sensitive technology from the region's harsh desert conditions.
- **Audi:** Engaged in a strategic venture to establish an SUV manufacturing plant in Saudi Arabia, in collaboration with Sheikh Tareq bin Abdul Hadi Al-Qahtani. Although the project was not completed due to regulatory and logistical challenges on Sheikh Al-Qahtani side, it underscored our capacity to attract and manage global partnerships with world-class manufacturers.
- **Rosoboronexport:** Represented Russian defense manufacturers at the Dubai Airshow as an exhibitor, facilitating introductions and showcasing advanced military aviation technologies to key stakeholders in the Arab world.
- **KDV (Germany):** Acted as agents for the launch of eco-friendly waste-to-diesel processing plants in the Middle East, promoting sustainable industrial solutions aligned with regional environmental goals.
- In addition to other projects... that highlight our ability to bridge international expertise with regional opportunities through trust-based, high-level relationships.

PUBLICATIONS

Author – Learn Python in Less than a Week

تعلم بايثون بأقل من أسبوع

This professionally crafted book offers a clear and accessible introduction to the fundamentals of Python programming. Developed over three years of dedicated effort, it aims to empower the next generation of Arab talent with the essential skills needed to pursue careers in artificial intelligence and the broader technology sector.

The book is available in two versions — Arabic and English — to ensure accessibility and support for young Arabic speakers.
